

Data-Driven Growth: Converting Casual Bike Riders to Annual Members

Cyclistic Bike-Share Case Study (2014)
Prepared by: Moise Kobokiba, Junior Data
Analyst

A dark blue diagonal gradient bar that starts from the bottom left and extends towards the top right, covering the lower half of the slide.

The Business Task (The Plot)

The Goal: Maximize future growth by converting existing casual riders into annual members.

The Core Question: How do annual members and casual riders use Cyclistic bikes differently?

Data Pipeline & Cleaning (The Breadcrumbs)

Data Foundations: Source: 12 months of historical trip data (2014).

- **Scale:** Millions of rows processed securely via Google BigQuery.
- **Quality Control:** Omitted trips < 1 min (accidental docks) and > 24 hours. Mapped legacy schema variables for consistency.

Hourly Usage Patterns (The Discovery)

Members Commute. Casuals Cruise. Members: Sharp spikes at **8:00 AM** and **5:00 PM** (Work/School Rush Hours).

- **Casuals:** A steady, continuous curve peaking in the afternoon.

Hourly Trends

Weekly Volume Trends (The Shift)

The Weekend Takeover

Weekdays: Annual members dominate total volume (Monday–Friday).

- **Weekends:** Casual riders spike dramatically, overtaking or matching member volume on Saturdays and Sundays.

Weekly Trends

Trip Durations (The Surprise)

The Value Gap: Casual Trips Last 3x Longer

Members: Short, hyper-efficient trips (12 minutes).

- **Casuals:** Long, extended asset engagement (30 minutes).

Average Duration

The Pitch (The Mountaintop)

Strategic Recommendations

1. The "Weekend Warrior" Annual Membership:

Launch a weekend-only subscription pass targeting high-volume Saturday/Sunday casual riders.

2. **Contextual App Promotions:** Trigger real-time, in-app membership upgrade discounts at high-duration leisure hotspots during peak weekend afternoons.
3. **Revamp Digital Media Creative:** Shift marketing imagery for casuals away from corporate commuting and heavily toward lifestyle, health, and weekend exploration.
